### Superclamp Rear

676-2005

\$144.95-H

This tie down system features a tension adjustment knob that can adjust to fit all rear skis. The Superclamp-Rear features a newly designed handle with an advanced over center cam, and a built in safety lock system making it easy to secure. By removing the safety key provided and replacing it with a standard pad-lock, the Superclamp-Rear system becomes a theft deterrent.

- World's first highly engineered fiber filled composite tie down system
- Light weight - approximately 3 lbs.
- Eliminates the use of tie-down straps and ratchet straps - tightens with **JUST ONE EASY PULL!**
- Strong and durable (to withstand all the elements).
