Replacement Handle - Large	676-2007	\$ 1.00-H
Replacement Safety Key	676-2008	\$ 1.50-H
Repl. Lift to Turn Knob w/spring	676-2009	\$ 1.00-H

Superclamp Rear

676-2005

\$144.95-H

This tie down system features a tension adjustment knob that can adjust to fit all rear skids. The Superclamp-Rear features a newly designed handle with an advanced over center cam, and a built in safety lock system making it easy to secure. By removing the safety key provided and replacing it with a standard pad-lock, the Superclamp-Rear system becomes a theft deterrent.

- World's first highly engineered fiber filled composite tie down system
- Light weight - approximately 3 lbs.
- Eliminates the use of tie-down straps and ratchet straps - tightens with **JUST ONE EASY PULL!**
- Strong and durable (to withstand all the elements).

SUPERCLAMP REAR

TRAILER ACCESSORIES

Trailer Hub 4/4

\$128.95-J

- Aluminum construction
- Never rusts
- Non-slip tread design
- Lightweight
- Folds for easy storage
- Weight capacity: 400 lbs

TRAILER ACCESSORIES

MX LOCK-N-LOAD MOTO TRANSPORT SYSTEM

Risk Racing Lock N Load 665-77849 \$199.95-H

The Lock-N-Load securely holds your motocross bike into your trailer without the use of tie-down straps, floor anchors or wheel chocks. It takes an enormous amount of pressure off of the fork seals during transit, and it frees up valuable space allowing the transport of more motorcycles or gear. Additionally, the Lock-N-Load can quickly be removed from the trailer floor by unscrewing the 4 thumb screws leaving only the low profile mounting plates. Each plate has a "D" ring for additional anchor points on your trailer floor.

To operate the Lock-N-Load, rotate the knobs into the lock position and simply roll or ride your bike into the trailer until your foot pegs hit the open jaws of the Lock-N-Load. Then step on the upper jaws and they will automatically lock into place. To release your bike, simply rotate the knobs into the release position and step on the top jaws. This will automatically release the jaws and free your motorcycle. For additional safety, insert the attached locking pins prior to transport

- Saves fork seals by drastically reducing fork seal pressures.
- Reduce fork seal pressure.
- No more web of straps, wheel chocks or floor anchors.
- Load more bikes and gear in your truck or trailer.
- Designed for use with 125 cc- 450 cc modern motocross specific bikes, or bikes with similar geometry regarding foot peg width and height.
- Weight: 14 lbs , Measures 18" x 9" (45.72 cm)
- Truck bed adapter plates and extra trailer plates are available

DESCRIPTION	TCI PART #	RETAIL
Truck Deck Adaptor	665-77879	\$37.95-H
