

AXLE KITS

* see page 498 for Kit Pricing

We are proud to introduce DP Double Precision the "King Kong" of Axles. With many years of automotive experience they bring the best quality, materials and manufacturing processes to the ATV/UTV industry.

"Standard Axles" are made with a 40 Chromium Steel Shaft with the "Heavy Duty" version is made from a 42 Chromium Molybdenum Steel providing exceptional strength-to-weight ratio that withstands extreme torque loads. The Heavy Duty Axle Kit can operate at huge swing angles (45 up to 47°), which is generally needed after larger tires are added.

* This is a new line for us and the parts numbers with an ".so" will be special order. It will take an extra week to ship these items and will cost \$10.00 more.
