

DALTON ATV CLUTCH KITS - YAMAHA

Yamaha Grizzly 660 4X4 - DBW 660Y

238-1401

\$122.95-F

- Oversized tires

Installation of larger tires results in taller gearing, heavier rotating mass, and drastic negative effect on the performance of this model. This kit is designed to help restore that lost power, and bring your big tire Grizzly back to life. It was designed for use with oversized tires.

* Dalton does not currently recommend or offer a clutch kit for this model with stock tires.

Yamaha 700 EFI Grizzly 4x4 - DBW 700Y

238-1402

\$109.95-F

- 2007 and up
- oversized tires/high elevation

This kit is a very cost effective method to help minimize the performance losses from installing oversized tires. This combination of different weight rollers for the drive clutch is a variable tuning kit and can be set up for different oversized tire and altitude applications. There is no increase in engagement (stall) rpm, so this kit still works well for
