ATV RIM APPLICATIONS

- Designed and engineered exclusively by ITP. Made from deep draw 13 gauge high strength steel, or durable aluminum alloy. Ideal for racing or recreation. Replacement wheels in multi-fit patterns reduce your inventory. Please note that not all of our replacement wheels match OEM wheel offset.

HOW TO READ ITP WHEEL SIZING SPECIFICATIONS:

For example, wheel is sized:

8 x 8, 3+ 5 4 / 110
Code#: 1 2 3 4 5

- The diameter of the wheel; also the inside diameter of the tire.
- The width of the wheel.
- Offset of wheel; for example, 3 + 5, means 3" off-center inside and 5" offset to the outside. Most wheels are centered, with no offset, unless indicated.
- Number of bolt holes in the wheel.
- Spacing of bolt holes (usually in millimeters), measured from center of bolt hole diagonally across center of wheel to center of opposite bolt hole.
