

# HANDLEBAR GRIPS

**NEW!**

## RISK RACING ERGO WAVE GRIPS

709-00109

\$23.95-J

The New Risk Racing Ergo Wave Grips are a high quality, Dual-Compound soft grip with a reinforced grip end and an ergonomically designed grip flange. The "wave" in the flange is designed to reduce pressure and heat on your hands to reduce blisters.

## RISK RACING GRIP DONUTS

709-00110

\$4.95-K

Just slip them over your grip and forget about blisters on the side of your thumbs.

## RISK RACING MUD GRIPS

709-00139

\$8.95-J

The Mud Grip is a grip cover that allows riders to maintain control of their bike when riding or competing in muddy conditions. The Mud Grip enables riders to keep a tight grasp by making the grips feel dry, even on the nastiest tracks or trails. Slide over your grip when riding in mud or rain and the mud grip makes a slippery grip feel dry.

- Ultra thin design does not affect grip diameter
- Slips over any MX, ATV, MTB or BMX grip and can be used with barkbusters
- Mud Grips can be washed after use and re-used

## PALM PROTECTORS

\$8.95-K

Motocross and trail riders are all too familiar with blisters. They can tear up the hands of even the strongest riders. Palm Protectors are a very thin, protective layer offering full coverage protection of the palm as well as the saddle area between the index finger and thumb. The Palm Protectors also aid in reducing the dreaded "Arm Pump" by absorbing vibration transferred through the handlebars. Worn under the gloves, riders don't even notice the ultra thin Palm Protectors, but they do recognize the vibration reduction and much needed protection against blisters.

- sold in pairs

SIZE	TCI PART #
Small / Medium	476-00116
Large / X-Large	476-00111

**NEW!**

## CARBIDE PERFORMANCE MOTO GLOVE

\$36.95-H

These innovative, lightweight gloves are sewn with the fingers in a pre-curved position, to prevent tightening of the gloves as the rider flexes and bends their fingers to grip the handlebars more tightly in those intense moments pushing for the holeshoot. The Carbide Motocross Gloves also feature reinforced thumb panels to make them more durable, allowing them to hold up against heavy abuse when the rider is competing in a race, trail riding deep in the woods, or practicing on a local track.

- Lightweight, flexible, and reliable; but also reinforced, durable, and aggressive
- Made of 3D Stretch I-Span which allows for superior movement and airprene fabric for maximum breathability
- Silicone Coated Single-Layer Palms and Fingertips for the best possible gripping potential
- Lycra knuckle reliefs provide the rider with increased flexibility

\* **FOR PROPER FITMENT WRAP A FLEXIBLE TAPE MEASURE AROUND THE WIDEST PART OF THE HAND. DO NOT INCLUDE YOUR THUMB**

HAND WIDTH	SIZE	TCI PART #
5 - 7"	X-Small	476-00124
