

TDR "HYPER TENSION" REEDS

- TDR "HYPER TENSION" reeds are made of the highest quality material available. This material is custom designed by TDR to give the best possible performance and have a long working lifespan.
- TDR "HYPER TENSION" reeds use a tension reducing spacer to reduce the bending resistance of the reed petal. This spacer allows the reed to open quicker. The quick response action of the reed allows the fuel-air mixture to enter the engine faster. With this faster intake action, there is an increase in throttle response and low speed performance.
