TIRE STUFF

VALVE CORE

170-931

- Features exterior spring and makes a metal to metal seal with the valve body, which is not affected by heat or aging. Short valve core can be used in any tube.
- Sold in boxes of 10

VALVE CAP

170-072

- High quality steel caps with rubber seals.
- Sold in boxes of 10

TUBLISS SYSTEM

TUBLISS GEN 2 SYSTEM

Improved Traction - TUBliss® secures the bead so securely that it allows a low tire pressure for improved straight line traction without the risk of a pinch flat or tire bead slippage. And because you can have much lower tire pressures, traction is improved.

Virtually Flat Proof - TUBliss® really is virtually flat proof when used with a tire sealant. Sealants can't work on tubes where holes in the rubber stretch and tear. With TUBliss®, your sealant works directly on the tire where it matters.

Weight Savings - TUBliss® also provides a weight savings of up to 3 pounds per wheel which instantly translates into less rotating weight and increases acceleration.

Runs Cooler - Without the weight and friction of a conventional tube installed, tire temperatures are greatly reduced. This also eliminates tire pressure increases during the course of a moto.

Rim Protection - TUBliss® protects the rim from dings and dents by holding the tire firmly and making the sidewalls stay upright and absorb the full impact, unlike bending and deflection of conventional tubes.

DESCRIPTION	PART #
