## DUNLOP TRACK-DAY TIRES

### SPORTMAX Q5 - STREET LEGAL HIGH PERFORMANCE TRACK-DAY RACE TIRE

The Dunlop Sportmax Q5 is designed to increase the depth of the Sportmax family lineup to accommodate track-day-level riding like no other Dunlop DOT street tire has before, with even greater overall performance and grip than the Q4.

**NEW!**

- Having enhanced constructions, profiles, compounds, and tread patterns, the Q5 is the new benchmark for track-day tires.
- The Q5 is even more user-friendly, has dry and wet grip, tire compliance, and warm-up times have all been improved. Tire warmers are not necessary for track use.
- Sharply defined new tread pattern with lower groove density puts more rubber on the ground at all lean angles.
- New taller profile with improved corner entry and high-speed stability at full lean.
- Both front and rear tires utilize Dunlop's proprietary Racing Type Fine Carbon Technology in the tread compound.
- Performs better in the wet, warms up quicker, does not require tire warmers, and is engineered to run on the track at close to street pressures.
- The Sportmax Q5 is DOT-approved for street-legal use.

**Jointless Tread –**  
Optimizes the ideal stability,  
flex and grip where it's  
needed most across the tire's  
tread profile

**Intuitive Response Profile –**  
It's like your tire knows what  
you're thinking.

### SPORTMAX Q4 HIGH PERFORMANCE TRACK-DAY TIRE

The new Sportmax Q4 is a purpose-built track-day tire that achieves lean angles up to 62 degrees, which is more than any other street-legal tire Dunlop has ever made. This user-friendly, non-tire warmer, tire is designed to offer performance and grip like no other street tire.

**WHILE STOCKS LAST!**

- Rear tire compound contains carbon black like Dunlop's racing slicks for maximum grip.
- Jointless Tread (JLT) technology uses a continuously wound strip compound to optimize stability, flex, and grip across the rear tread profile.
- Carbon Fiber Technology (CFT) uses carbon fiber reinforcement in the sidewalls for exceptional cornering performance, braking stability and feel.

## DUNLOP SPORT / SPORT TOURING TIRES

### SPORTMAX Q5S - HIGH PERFORMANCE STREET LEGAL SPORT/SUPERSPORT TIRE

Having enhanced constructions, profiles, compounds, and tread patterns, the Dunlop Q5S provides nimbler handling and improved dry and wet grip to make it even more user friendly all while maintaining class-leading durability.

- The front tire profile and construction were changed to allow for a 7mm shorter tire. This shorter profile created a lighter steering feel and quicker turn-in rate to allow for a nimble handling tire.
- Intuitive Response Profile™ (IRP) technology allows for a taller tire profile along with sides that taper in more aggressively for remarkable turn-in response and feel.
- MT Multi-Tread™ technology in the Q5S rear tire uses a silica-infused, long-wearing compound in the center of the tread for longer tread life, and special lateral grip compounds on the left and right shoulders for outstanding grip.
- Improved compound to enhance both the dry and wet grip by adjusting the polymer, changing to a softer shoulder compound, increased the amount of carbon black content by utilizing Carbon R technology and increased oil content.
- Optimized tread pattern design to aid in quicker warm-up times and improved wear characteristics.
- The Sportmax Q5S is DOT-approved for street-legal use.

## DUNLOP SPORT / SPORT TOURING TIRES

### MUTANT - SPORT RADIAL TIRE

- A high-silica compound and deep tread channels provide exceptional performance in wet conditions.
- MT Multi-Tread in the rear tire gives the Mutant high mileage for touring and commuting, and the high-grip lateral compounds give the Mutant full sport-tire capabilities.
- Jointless Belt (JLB) construction front and rear to provide a more compliant ride and more consistent handling.
- Carcass Tension Control System (CTCS) allows for different tension built into the architecture to provide stiffness and compliance where needed.
- An aggressive tread pattern with the performance to match in any condition a rider may encounter.

Two compounds in the same tread give riders great mileage without sacrificing handling.

### SPORTMAX GPR-300 - SPORT TIRES

The Sportmax® GPR-300 is a radial tire that offers well-balanced sport performance for a variety of sportbikes.

- Radial tire technology helps to provide enhanced grip in wet and dry conditions.
- Optimized construction to enhance handling and responsiveness for street-going sport riding.
- Advanced belt design and Jointless Band (JLB) rear tire construction utilizes a continuously wound belt for smooth performance and a consistent tire contact patch.
- Aggressive sport-derived tread pattern for enhanced on-bike appearance.

## DUNLOP SPORT / SPORT TOURING TIRES

### SPORTMAX ROADSMART IV - PERFORMANCE-TOURING TIRES

The all-new Roadsmart IV delivers best-in-class handling, grip, and mileage. Featuring a completely new tread pattern, construction, compounds, profiles, and new technology.

- Compared to the Roadsmart III, the RoadSmart IV increases mileage by 23 percent in the front and 26 percent in the rear.
- New tread patterns, construction, compounds, and profiles increase ride comfort, grip, and mileage.
- New technology allows the RoadSmart IV to maintain its high performance throughout its lifespan.
- MT Multi-Tread™ technology in the rear tire uses a long-wearing compound in the center and special lateral compounds on the shoulders for outstanding grip.
- New sidewall construction improves wet and dry handling and comfort...

### SPORTMAX ROADSMART III - PERFORMANCE-TOURING TIRES

Performance Touring is born. Introducing a tire that not only lasts longer, but performs at higher levels than the competition throughout its lifetime.

- Dunlop's exclusive MT Multi-Tread™ design binds a high-mileage compound to the center, and high adhesion compound to the lateral flanks for high cornering grip.
- New front and rear tire compounds enhance wear resistance, and include an innovative resin that increases wet grip.
- Rear tire profile designed to increase the footprint and improve mileage.
- Optimized construction for mileage and wet performance.
- New sidewall construction helps to provide superior shock absorption and precise handling.
- Innovative new cross groove tread pattern achieves better drainage in the wet for more grip.

## DUNLOP CRUISER / TOURING TIRES

### ELITE 4 - TOURING TIRES

The Elite 4 with MT Multi-Tread technology in the rear provides significantly more mileage than single compound tires. It's also available in sizes to fit hundreds of different models, from new Gold Wings to bikes dating back to the early 1980s.

- All Elite 4 rear tires utilize Dunlop's MT Multi-Tread technology with a long-wearing compound in the center of the tire and a lateral-grip compound on each shoulder, providing increased mileage without sacrificing handling.
- New tread pattern helps provide class-leading wet-pavement performance, even wear over the life of the tire, and less road noise.
- Available in radial and bias-ply construction, the Elite 4 fits hundreds of touring, cruiser and standard bikes, including current and non-current machines.
- High-mileage, even-wear characteristics, and great grip- the all-new Elite 4.

great mileage without  
sacrificing handling.

### ELITE 3 - TOURING / CUSTOM TIRES

Complete range of radial, bias, and bias-belted high-mileage premium touring tires.

- The bias-ply Elite 3 features the shape of modern radial-construction tires and offers many of the same benefits.
- The high-mileage E3 bias and bias-belted and radial tires suit a wide range of large-displacement touring motorcycles as well as many of the most popular cruiser bikes.
- The Elite 3 tread pattern provides class-leading wet-pavement performance, even through large puddles of standing water.

## V-TWIN TIRES

### AMERICAN ELITE V-TWIN TOURING / CRUISER TIRES

Dunlop's American Elite is the only aftermarket tire line for Harley-Davidson motorcycles that are designed and tested in the U.S.A. The American Elite features MT Multi-Tread rear-tire technology for great handling and high mileage. Sizes available for newer and older Harley-Davidson models and select Victory and Indian motorcycles.

- Delivers enhanced tire mileage thanks to an MT Multi-Tread rear tire compound that incorporates a long-wearing compound in the center of the tire, along with a lateral-grip compound on each shoulder for great handling.
- MT Multi-Tread rear tire incorporates a long-wearing compound in the center of the tire tread and a lateral-grip compound on each shoulder to enhance cornering performance and provide class-leading grip and feel.
- American Elite is the premier aftermarket choice for Harley-Davidson riders in search of tires that deliver extended tread wear.
- Sizes available in black (BW) narrow-white (NW) and wide-white (WWW) sidewalls for older Harley-Davidson models..

V-Twin

**Multi Tread Technology**  
Two compounds in the same tread give riders great mileage without sacrificing handling.

## DUAL SPORT TIRES

### TRAILMAX TR91 DUAL SPORT STREET(80% STREET / 20% OFF-ROAD)

The Trailmax TR91 has been specifically engineered for the growing number of riders who want new experiences – the kind that aren't always found on numbered roads. It delivers precise handling, confident traction and long-distance comfort across a wide range of surfaces, along with low wear rates.

- JLB (Joint-less Belt) construction front and rear for optimum stability and shock absorption (available in radial sizes only)
- Specific block design to deliver the best on- and off-road performance
- AOF (Aromatic Oil Free) rubber compound to help protect the environment

SIZE	PART #	REFERENCE	TYPE	SIDEWALL

### TRAILSMART ADVENTURE & TRAIL DUAL SPORT STREET (80% STREET / 20% OFF-ROAD)

Designed to compliment the weight and massive power of today's large displacement adventure bikes, the Trailsmart is a tire for serious riders who place a priority on mileage and wet and dry grip, who ride primarily on the street, but also explore beyond the pavement's end.

- New tread pattern with intersecting grooves increases wet weather performance as well as off-road traction.
- Large footprint and even pressure distribution helps increase traction and mileage.
- Silica-fortified tread compound enhances traction and grip in wet and dry weather, and helps reduce rolling resistance for better mileage.
- Exceptional cornering grip in all conditions.
- Tubeless

### D607 DUAL SPORT STREET (80% STREET / 20% DIRT)

Designed for dual-sport bikes ridden primarily on the street, the D607 provides enhanced cornering and wear performance, excellent high-speed stability and exceptional tire compliance.

- The D607's tread pattern features wide, stable central blocks with large grooves for superb water drainage and small grooves for optimal wear.
- Single radius design maintains a consistent footprint at different lean angles for improved feel and progressive steering response.

## DUAL SPORT TIRES

### TRAILMAX MISSION DUAL SPORT ADVENTURE TIRE (50% DIRT / 50% STREET)

A true adventure tire offering premium performance in a wide range of terrain. After more than two years in development, the Trailmax Mission delivers knobby-like performance off-road, has impressive grip on the street, plus great ride quality, and stability everywhere it goes.

- An aggressive tread pattern yields traction in hard terrain.
- Built-in rugged tread blocks feature Staggered Step design, a step-down feature to provide rigidity in the contact patch to enhance stability and handling.
- Wrap-around lugs on the tire's edge help protect the tire from sharp rocks and provide additional off-road traction.
- New compounds deliver the perfect balance between road and off-road performance and deliver class-leading mileage performance.
- Deep grooves excel in wet weather conditions and offer additional biting edges for off-road performance.
- The Trailmax Mission tires are tubeless, however, if mounting on rims that require a tube (i.e., spokes) the appropriate tube may be fitted.

### D605 DUAL SPORT TIRE (50% DIRT / 50% STREET)

The Dunlop D605 offers versatile Dual Sport performance at a value-oriented price. This DOT-legal knobby fulfills the needs of dual-sport riders who tackle serious off-road terrain. Designed to offer a balance of performance and value.

- A dual-sport tire for the price-conscious customer.
- DOT legal.
- Versatile tire performance allows riders to travel on the street and venture off-road.
- A tire equipped to go anywhere, the D605 is a value option for the all-around rider.

and value.

## DUAL SPORT TIRES

### D908RR ENDURO DUAL-SPORT ADVENTURE OFF-ROAD (90% DIRT / 10% STREET)

The adventure D908RR is designed for aggressive adventure and cross-country conditions and provides enhanced wear resistance and grip over rocks, hard ground, and other off-road terrains.

- Designed for the speed, horsepower and weight of large-displacement rally-type machines.
- DOT approved for street-legal use.
- Reinforced tread blocks yield enhanced traction and stability.
- Generous open space around the shoulder area helps optimize traction in sand and mud.
- Heavy-duty casing for excellent bump absorption and allows lower air pressures for a larger footprint and increased traction.

<b>REAR</b> 150/70B18	D9081408018	45052370	BW

### D606 DUAL SPORT ADVENTURE OFF-ROAD TIRE (90% DIRT / 10% STREET)

DOT Street legal dual-sport tire with an emphasis on aggressive off road traction. The D606 is the go-to tire for serious off-road riding, with a dash of street riding mixed in. Long-lasting, and featuring a full-depth knobby pattern, the D606 works in a wide variety of off-road terrain.

- Provide grip and handling for off-road performance.
- A full-depth tread pattern designed for rigorous off-road use yields excellent traction on everything from hard-packed fire roads to soft single-track trails.
- Tall knobs for extra braking & cornering traction
- The D606's tread compound is also engineered for good highway wear and grip.

### GEOMAX EN91 ENDURO TIRE (90% DIRT / 10% STREET)

Unique off-road tire designed for the wide and varied range of terrains encountered during Enduro racing.

- New pattern helps enhance sand and mud traction and offers more nimble handling.
- A new compound helps provide longer life and stronger grip performance.
- Front and rear tires are equipped with Dunlop's patented Block-In-A-Block technology to improve knob flex, resulting in more durability.
- DOT approved for highway use.

Provide grip and handling for off-road performance.

**Hard Terrain**  
Works in hard packed conditions.

**Block-In-A-Block**  
Offers more progressive cornering action and additional slide control.

## DUNLOP GEOMAX MX/OFF ROAD

### GEOMAX AT81 / AT81RC (REINFORCED) / AT81EX (ENDUROCROSS) OFF ROAD TIRE

The AT81 and AT81RC (Reinforced Construction) and AT81EX (Endurocross) tires offer more all-around performance plus higher levels of ruggedness for off-road racing and riding.

- AT81 front tire construction includes two plies of nylon wrapped with a third ply of polyester for a strong base.
- AT81 rear tread block shape and distribution plus flexible knobs help the tire penetrate down through the surface dirt for extra traction across a broad range of off-road applications.
- Newly formulated high-wear-resistant rear tire compound offers enhanced chipping, tearing, and wear appearance.
- Geomax AT81 rear tire carcass features two nylon plies.
- Lateral grooves on the shoulder knobs provide additional biting edges and also allow the knobs to be more flexible.
- Rear center blocks are arranged in-line to provide a larger contact patch for maximum traction.
- Dunlop's "plush pad" recess design between tread blocks enhances compliance for bump absorption and ride comfort.

### GEOMAX MX12 - SAND AND SOFT MUD TERRAIN TIRE

The MX12 delivers next-level performance in a broader range of sand and mud-terrain through increased cornering acceleration grip, enhanced handling in ruts, and increased bump control. Designed to deliver optimum traction in sand and mud conditions, they are also available in mini sizes.

- Designed for soft-terrain applications, the MX12 excels in extreme sand and mud conditions.
- Innovative tread pattern includes new V-Block technology that increases traction and does a better job clearing the tire in muddy conditions to maintain maximum performance.
- Tread pattern includes Dunlop's exclusive Block-In-A-Block Progressive Cornering Block Technology (PCBT) in the rear for enhanced cornering traction and slide control.
- Recessed flex joints between tread blocks improve compliance for enhanced traction and ride comfort.
- Narrower tire profiles increase length of contact patch for improved bump absorption and improved steering in rutted conditions.

## DUNLOP GEOMAX MX/OFF ROAD

### GEOMAX MX14 - SAND AND SOFT MUD TERRAIN REAR TIRE

One of the most technologically advanced off-road tires Dunlop has ever offered. The MX14 offers increased traction/drive-grip on starts, straights and when exiting corners, improved braking performance for more rear tire stopping power in harsh conditions, perfect slide control when braking and cornering in sand and mud, and enhanced absorption/damping performance to keep the tire on the ground and digging in. Designed for soft-terrain applications, the MX12 excels in extreme sand and mud conditions.

- Offers increased traction/drive-grip on starts, straights and when exiting corners, improved braking performance for more rear tire stopping power in harsh conditions.
- Perfect slide control when braking and cornering in sand and mud.
- Optimized tread blocks that can more effectively penetrate and scoop sandy/muddy terrain thanks to the new Reinforced Scoop Technology (RST) and V-Block Technology Advanced (V-BT Advanced) designs.
- New Flexible Fin Technology (FFT) allows for improved stopping power and more progressive brake control.
- New carcass construction to improve absorption and damping by adding a ply to improve linearity when load is applied.
- The MX3S or MX33 front tire can be paired with the MX14 rear tire.

### GEOMAX MX33 - SOFT TO INTERMEDIATE TERRAIN TIRE

The most technologically advanced Motocross tire: Developed with the help of top motocross pros, the all-new MX33 is the new industry standard for soft-to-intermediate terrain. Dunlop's innovative new technologies offer superior grip, slide control, bump absorption, and enhanced durability.

- Front tire now features Block-In-A-Block technology to aid in linear tracking and improved steering.
- Altered Block-In-A-Block shape on the rear increases surface area of the rear block, while additional tread angles enhance grip, stability and slide control.
- Front and rear tires include new tie bars that connect each knob, improving durability by reducing flex at the base of the knobs.
- New Advanced Apex Design improves shock absorption by diffusing shock through a taller, thinner apex inside the sidewall.
- Multiple Block Distribution provides more blocks in the rear tread pattern, increasing the contact patch for better grip and slide control.
- Carcass Tension Control System allows even flex throughout the tire for increased bump absorption.

## DUNLOP GEOMAX MX/OFF ROAD

### GEOMAX MX3S - SOFT TO INTERMEDIATE TERRAIN TIRE

The Geomax MX3S targets soft-to-intermediate terrain and covers a wide range of different surfaces.

- Directional front tire design provides enhanced grip and steering feel.
- Original Equipment on popular Honda, Kawasaki, Suzuki, TM and Husqvarna fitments.

SIZE	PART #	REFERENCE
<b>FRONT</b> 80/100-21	120-8105	45071466

**Off-Road**  
Provide grip and handling for off-road performance.

### GEOMAX MX53 - INTERMEDIATE TO HARD TERRAIN TIRE

Designed to offer performance in a wide variety of terrains, the Geomax MX53 excels in hard-packed track conditions while also offering greater versatility in intermediate riding conditions.

- The front tire has been redesigned with a taller profile to offer a larger contact patch, providing gentler handling, a higher lean angle, and better maneuverability. Block-In-A-Block technology has been added to the front tire of the MX53 in order to aid in linear tracking and improved steering.
- Front tire blocks are 1mm higher and have been redistributed to give riders better steering feel and more biting edges. A horseshoe pattern of blocks on the front tire reduces the stiffness in the center of the tire to offer greater ride compliance. The unique pattern of the horseshoe blocks also grabs the dirt to provide better braking grip.
- The altered Block-In-A-Block shape on the rear tire allows for added flex in the knob to enhance grip while providing stability and slide control.
- Front and rear tires include tie bars between select knobs to reduce flex at the base of the knobs, improving durability. .
- Dunlop's Advanced Apex Design improves shock absorption by diffusing shock through a taller, thinner apex inside the sidewall.

### GEOMAX MX71 - INTERMEDIATE TO HARD TERRAIN TIRE

The Geomax MX71 brings cutting-edge technology to the dirt. Its tread patterns are directional, optimizing performance under braking and acceleration.

- Profile design with more tread volume (greater land/sea ratio) in the shoulders for excellent cornering grip.
- Directional front tire pattern for enhanced grip and cornering traction in hard-pack conditions
- Unique placement of "camber traction blocks" for optimum lean-angle traction and grip when exiting corners.
- Variable spacing between center tread blocks for enhanced performance.
- Recessed biting edges yield enhanced traction for greater grip throughout a wide range of terrain conditions.

### K950 TRIALS AND OFF-ROAD TIRE

The DOT-approved K950 trials tire K950 delivers the kind of performance trails riders and off-road enthusiasts are looking for, with additional durability and on-road capability.

- The K950 features bias-ply construction, and compounds and tread pattern designed to tackle tough single-track terrain and challenging conditions.
- In both wet and dry conditions, the K950 excels when the course or trail turns hard-packed, rocky, or littered with tree roots.
- For dual-sport riding, the K950 provides a smoother ride and longer wear than a traditional knobby tire on the street, while providing a high level of grip and bump-absorbing compliance in the dirt.

## BRIDGESTONE BATTLEAX RADIAL TIRES

### Battlax BT-002 & BT-003 Racing Tire

The Ultimate Sport Tire for Street

- Street Sport Tire with Ultimate Grip Performance.
- Designed for Sport Riding enjoyment with confident grip on streets and dry-condition circuits.
- Specially street-tuned tire developed from our latest racing tire BT-003 which has achieved many victories in production-class races (600 cc-1000 cc)

### BATTLEAX BT-003 RACING STREET

The Ultimate Sport Tire for street

BT003RS-1905517	134411	Z	BW	TL

### BT-016/BT016P HYPERSPORT

The BT-016 was designed to maximize the performance of sport bikes on the road.

Technical Features:

- Multi-compound technology delivers the grip performance demanded in every aspect – braking and strong traction at the exit of a corner
- Rear tire features a new triple compound (5LC) The center compound offers good stability, the power to the road with strong traction while the edge compound offers strong side grip and sc
- The steel MS-BELT (mono-spiral belt) construction applied to front and rear tires absorbs sudden impact from bumps and offers high stability and tremendous line-holding in corners
- HTSPC- ( High Tensile Super Penetrated Cord – Mono Spiral Belt ) technology in front and rear tire provides rich contact feel, strong grip and high-speed stability
- 3D-CTDM ( Comprehensive Tire Design Method ) is advanced tire design technology that enables dynamic, three-dimensional simulations of tire performance at all lean angles

## STREET RADIALS (OE SPECIALTY FITMENT)

### BT-012 ULTRA HIGH PERFORMANCE REPLACEMENT REAR SPORT RADIAL

- 3D comprehensive tire design
- Silica compound provides improved and exceptional grip level on both dry and wet surfaces without sacrificing highspeed durability.

PART #	REFERENCE	SPEED RATING	SIDEWALL PATTERN	TYPE
BT012-2005017R	122904	W	BW	TL

## BATTLAX HIGH PERFORMANCE SPORT RADIALS

### BT-090 OEM RADIAL

- For YAMAHA WR250X ('08-) (see page 23)
- Maintains high grip level from start to finish regardless of the temperature
- The unique pattern design optimizes both vertical and horizontal rigidity of the tire. Less grooves on the tread edge for better dry grip and machine control in corner, and more grooves in the center area for better wet performance
- Higher rigidity in sidewall area increases the grip in corners
- Better slide control for easier "line" tracing
- Improved high speed stability and anti shimmy for better street-riding performance

## BATTLAX HIGH PERFORMANCE SPORT RADIALS

### BT-014 ULTRA-HIGH PERFORMANCE STREET RADIALS

- Front: narrow construction for light handling, better feedback & improved stability
- Rear: Cap base construction with new bead construction, steel mono-spiral belt technology and silica rich compound to offer high speed stability and superior grip.
- Innovative tread design to improve traction, wet performance and noise reduction.

## BATTLAX SPORT TOURING / CRUISER RADIALS

### BT-023 SPORT TOURING REPLACEMENT RADIALS

- Full spec Sport Touring Radial offering consistent performance between touring and sport riding
- Tread pattern and rubber compound deliver long mileage, high level of wet performance a comfortable ride and good grip.
- 3LC (Dual Compound) technology for rear tire provides good stability and wear life in center and strong grip and bump absorption in shoulder of tire.
- Silica plus RC polymer (assists silica effect and controls rubber properties) enhances wet performance and wear life
- GT specs available for heavier motorcycles.

## SPORT TOURING / CRUISER RADIALS

### BT-021 SPORT TOURING REPLACEMENT RADIALS

- Sport Touring Radial designed for touring oriented riders wanting serious performance and high mileage
- Designed to provide good shock absorption with less vibration and noise to minimize fatigue on longer rides
- Rear tire is Dual Tread Compound with Cap Base Construction providing mileage from center compound and grip from shoulder compound, while enhancing tread stiffness for better grip, shock absorption, and all-weather performance.

PART #	REFERENCE	SIDEWALL	TYPE
<b>REAR</b> BT021-1905517R (OEM Fitment VFR1200 see page 23)	142894	BW	TL

### STREET SPORT RADIAL BT50

- Delivers a balance between excellent grip for street use, easy handling at all speeds and anti-shimmy performance.
- D.A.C. Silica compound provides exceptional grip on dry and wet surfaces without sacrificing high- speed durability.

### EXEDRA MAX RADIAL - TOURING AND CRUISER

- Specific rubber compound for cruiser applications provides long mileage
- Unique wide shape of tire profile supports touring-type riding while reducing fatigue
- Belt package construction provides linear handling even for heavy bike and 2-up riding
- Purpose-built rubber compounds and tread patterns enhance water evacuation and both dry and wet grip

## BATTLAX SPORT TOURING & CRUISER BIAS PLY

### BATTLAX BT-45 SPORT-TOURING (H-RATED) BIAS PLY

- Battlax BT45 V-rated bias ply, designed to give performance and mileage on sport bikes
- Battlax BT45 H-rated bias ply, designed to give performance and mileage on today's sport-touring bikes.
- Dual Tread Compound (DTC ) offering long lasting center compound and softer side compound
- Larger crown radius for greater stability and longer life.

### BATTLAX BT-45 SPORT (V-RATED) BIAS PLY

- D.T.C. - Dual Tread Compound
- Gives prolonged/even wear rate.
- With silica, allowing improved wet weather, cold temperature tire warm up.
- Computer designed tread for all seasons. Computer designed construction (CTDM)
- Improved flexibility for better comfort and tire "footprint".

<b>REAR</b> 117-0099 `	150/80-15	BW/TL	H

### TRIALS TIRE: KT962

The KT-962 is a 4-ply trials tire features a universal trials tread design and a rubber compound suitable for a variety of terrains. Works well for front or rear applications.

- Dependable 4-ply carcass design
- Rubber compound for a variety of terrains

PART #	SIZE
117-0115	275-14

## STREET TIRES

### DUAL SPORT PRESA DETOUR MA-PD RADIAL TIRE

The Presa Detour is a radial Adventure-Touring tire available for the V-Storm, BMW, and Triumph Tiger sizes. The Presa Detour offers excellent and responsive handling in both wet and dry, on and off-road conditions.

- Stable central blocks with large grooves for outstanding water dispersion
- Optimized tread pattern creates a larger contact patch for increased cornering confidence and smooth transition.
- Special formulated compounds yield low tread wear while offering outstanding traction.

PART #		REFERENCE			RIM SIZE
142-4500	Front	110/80R19	H	TL	2.50 x 19

## OFF-ROAD & MX TIRES

### MAXXCROSS SM M7308 REAR - SOFT TERRAIN SAND AND MUD TIRE

The SM is an exclusive sand and mud tire that combines a mud-repelling, silica-based rubber compound with a computer-enhanced tread design. In addition to its specially formulated compound.

- Computer-enhanced pattern design ensures optimal traction in sand and mud
- Specially formulated silica rubber compound and open tread pattern provide excellent self-cleaning tire characteristics
- Anti-flex knob bridges on shoulder reinforce side knobs for increased traction
- New for sand and mud terrain

PART #	SIZE	RIM SIZE
142-4061	110/100-18	2.15 x 18

### MAXXCROSS SI M7311 FRONT - INTERMEDIATE TO SOFT AND MUD TERRAINS

The MaxxCross SI's tire compound delivers excellent traction in soft/intermediate conditions. Its anti-flex knob bridges on side lugs offer solid straight-line stability. It also features an enhanced grip to allow for aggressive cornering.

- Excellent traction in soft/intermediate conditions
- Anti-flex knob bridges on side lugs offer solid straight-line stability and enhance grip for aggressive cornering
- New for intermediate, soft, and mud terrain

PART #	SIZE	RIM SIZE
142-4009	70/100-17	1.40 x 17

### SURCROSS 6023 ST REAR TIRE - INTERMEDIATE TO SOFT TERRAIN

Specifically designed for soft and intermediate terrain. This tire features an aggressive tread pattern with wide spacing to provide excellent stability and optimum grip

- Advanced rubber compound enhances straight line traction for maximum control.
- Specially designed tread knobs improve traction and minimize tire squirm.
- Stiff sidewall increases handling and puncture resistance.
- State-of-the-art construction provides ultimate bite and acceleration on soft terrain

PART	SIZE	RIM SIZE
142-M6023 25010	250-10	1.50 x 10

### MAXXCROSS ITM7304 FRONT TIRE - INTERMEDIATE TO HARD TERRAIN

The MaxxCross IT features a new knob design to provide superb handling in a variety of soil conditions. In addition, a new rubber compound enhances stability and adds grip.

- Specially designed compound increases durability in rocky or desert conditions by reducing chipping and cutting
- New knob design offers precise steering for a wide variety of soils.
- Stiffer carcass design minimizes flex, reducing the chance of pinched tubes

PART	SIZE	RIM SIZE
142-M73049020	90/100-20	1.85X20

## CHENG SHIN TIRES

### HI-MAX C906 FRONT / C907 REAR STREET TIRE

- General Replacement Street Tire
- Center groove enhances handling and stability at high speeds.
- Wide tread surface and special rubber compound for high-speed traction.
- Diagonal tread disperses water quickly and efficiently enhancing wet weather performance
- Tubeless construction

142-2029	Rear	28 x 12 - 12

### Cheng Shin C868 Jackal Utility ATV Tire

Specially designed lugs deliver excellent traction in all conditions. Large shoulder knobs add side-bite in deep ruts. Widely spaced, self-cleaning lugs. Light-weight for ultimate performance. 4-ply rated.

PART #	SIZE
142-2503	22 x 8 - 10

### Cheng Shin C865 General Purpose Rear ATV Tire

- 2 Ply

PART #	SIZE
142-2533	20 x 9 - 8

### Cheng Shin C828 Rear ATV Tire

Great for riding in the Mud and Snow. Versatile workhorse tires get you through rugged terrain with deep-biting lugs

- Wide, alternating traction bar tread offers plenty of traction without getting bogged down
- Outstanding, self-cleaning tread pattern
- Minimal side-to-side slip in turns
- Tubeless

PART #	SIZE
142-2552	24 x 11 - 10

## DUNLOP ATV TIRES

### Dunlop Quadmax 805 Rear Utility ATV Tire

When tough riding condition dictate that bigger is better, Dunlop's Quadmax delivers outstanding traction and handling.

- 45 center block furnishes optimum forward and side grip
- Specially stiffened carcass incorporates two nylon body piles laid at a rigid case angle for large block stability through the contact patch

PART #	SIZE
120-1009	25 x 11 - 12

### Dunlop KT405C Rear ATV Tire

OE and replacement ATV tires from Dunlop

- Directional V tread enhanced with long bar-short bar pattern for enhanced traction and ride
- OE replacement for Honda TRX450S/ES 4x4 thru to 2001

PART #	LOCATION	SIZE

## KINGS ATV TIRES

### Kings KT-107 Super Aggressive Tire

Designed to pull through the deepest mud bogs and the 27" tire height increases ground clearance. Heavy-duty 6-ply construction.

PART #	SIZE
117-0112	27 x 10 - 12

### Kings KT-103 Super Aggressive Tire

Superior traction with large self-cleaning lugs. Deep cut channels and hollows for that extra bite in loose soil or mud Heavy-duty 4-ply (actual) construction out performs and out lasts the competition. The 4-ply carcass helps prevent punctures and adds stability when carrying heavy loads

PART #	SIZE
117-0066	25 x 10 - 12

## MAXXIS ATV/UTV TIRES

### Ceros - MU07 Front / MU08 Rear UTV Tire

- Built to handle the extreme abuse your UTV takes
- Radial construction provides better shock absorption, allowing for a smoother ride
- A directional , tread pattern provides steering precision and straight-line stability at high speeds
- Optimal for hard pack to intermediate conditions
- Strong 6-ply rating for maximum durability

PART #		SIZE
142-2311	MU07 Front	26 x 9 - R15

### iRazr - M943 Front

- Radial construction increases ride comfort and reduces bump steer
- Innovative tread pattern combines responsive steering with predictable braking characteristics
- Durable 6-ply rating adds high degree of puncture resistance and increased tire life

PART #	SIZE
142-2071	22 x 7 - 10

## ITP TIRES

### ITP Blackwater Tires

- Thicker sidewalls allow this tire to be run even after a puncture
- Features special rim-guard to protect wheel and help prevent air loss
- Heavy-duty 4 ply construction

SIZE	PART #
20 x 12 x 10	113-121
22 x 12.5 x 10	113-221
