IGNITION WIRE SETS

Accel 8.8 300+ Race Wire

- RFI Suppression - 300+ Race Wire - dramatically reduces radio frequency interference, compared to metallic core wire, which can disrupt on-board engine computers and racing communication systems
- Dielectric Strength - Extra thick 8.8 mm silicone jacket and insulation help to eliminate electrical "leakage".
- Temperature Resistance - 300+ Race Wire delivers peak performance even at racing temperatures over 500°F.
- Tensile Strength - Ultra strong Aramid/Fibreglass core and fibreglass braiding provide unequalled resistance to "wire Stretch".

Accel 8.8 300+ Race Wire has a resistance of only 150W per foot, compared to stock ignition wire resistance of 5000W to 7000W per foot.

TCI PART #	DESCRIPTION	RETAIL
950-850001	Accel Wire Set 300+ HEI Style Coil for Twins	\$38.52
950-850002	Accel Wire Set 300+ for Conventional Tower Twins	\$38.52

Accel 8.8 Silicone Plus Wire Sets

- Voltage Capacity - Accel 8.8 Wire is available in Spiral Core RFI-Suppression Conductor providing maximum conductivity to deliver peak output to spark plugs computers and racing communication systems
- Dielectric Strength - Extra thick 8.8 mm silicone jacket over silicone insulation and heavy silicone boots eliminate electrical leakage which can cause misfire.
- Temperature Resistance - High temperature silicone jacket, insulation, and boots ensure peak performance even at temperatures over 500°F.
- Tensile Strength - Strong fibreglass braiding provides unequalled resistance to wire "stretch".

TCI PART #	DESCRIPTION	RETAIL
950-850003	Accel Wire Set HEI Style Coil for Twins	\$22.54
950-850004	Accel Wire Set for Conventional Tower Twins	\$22.54

Accel Boot Lock Lit

- Positively secures the ignition wire boot to the spark plug to prevent it from coming off accidentally.
- Designed for straight, 45° and 90° spark plug boots.
- Installs quickly and easily.

TCI PART #	DESCRIPTION	SPARK PLUG TYPE	RETAIL
950-850006	2 Cylinder Engine	13/16"	\$17.29
950-850007	3 Cylinder Engine	13/16"	\$21.25

IGNITION WIRE

- For racing or recreational
- Includes (2) 4-wire separators, (2) 3-wire separators, and (4) 2-wire separators
- Available for 7 mm and 8 mm wire and for 8.8 mm and 9 mm wire

TCI PART #	DESCRIPTION	RETAIL
950-850008	8.8 - 9 mm (2 cylinder)	\$7.92
950-850009	8.8 - 9 mm (3 cylinder)	\$7.92
950-850010	7 - 8 mm (2 cylinder)	\$7.92
950-850011	7 - 8 mm (3 cylinder)	\$7.92

Accel Ignition Coil Set for Sea-Doo

950-850014

\$136.45

- Accel's Super Coil is the first coil that allows you to change wire and run high performance wire for stronger and more efficient delivery of energy and flash front at the spark plug.
- Fits all 2 cylinder Sea-Doo CDI (1.2 ohm)

FLYWHEELS

Accel Charging Flywheel

- One of the best ways to achieve better throttle response is to replace the stock flywheel with an Accel light, high strength aluminum flywheel.
- Precision balanced to spin with a fraction of a gram.

PUMP AND HANDLING

Accel Ride Plates

- A design that enhances performance by improving control
- Makes turns tighter and more controlled.
- Made of Al-Mag (an aluminum magnesium alloy) and powder coated to eliminate possibility of corrosion

Ride Plate

Accel Intake Grates

- Reduces cavitation to provide superior top end speed and cornering control.
- Made of Al-Mag (an aluminum magnesium alloy) and powder coated to eliminate possibility of corrosion

Intake Grate

Accel Drive Couplers

- All couplers are made from aerospace aluminum and are precision balanced.
- Radiused edges prevent premature damper wear
- Anodized black to help resist corrosion

Drive Coupler

IMPELLERS

- Teflon Finish - Less drag, increased durability, increased performance and reduced cavitation.
- Less Weight - Up to 20% lighter for quick throttle response and better top speeds.
- CAD Designed - More concentric and perfectly balanced for increased performance and less drive-line stress. (Imperfections in hub concentricity is the primary cause of induced cavitation)
- Unique 2 piece design reduces weight, allows smoother transfer from shaft to hub, eliminates exposed hex on Yamaha impellers. A covered hex allows easy installation and removal on all applications.
