

SURVIVAL AND SAFETY EQUIPMENT

The chances of survival for an avalanche victim drop from 93% to 26% within the first 45 minutes. If the victim is found within the first 15 minutes, he has a 93% chance of survival. (Statistics: Brugger/Falk) An experienced person may locate the position of a person buried in an avalanche within 5 to 10 minutes.

During this time the chances of survival are the highest! BE PREPARED!

ESBIT® Pocket Stove

668-2030

\$18.95-J
