

**BELTS**

**POWERMASTER™ BELTS by AAEN**

- Have had over 12 years of R&D.
- Been tested in extreme weather conditions.
- Suitable for deep powder, hill climbing, endurance racing, oval tracks, & grass drags.
- A unique combination of top cog design, harder CVT compound, and heavy duty Kevlar cords are matched to a 29° belt angle that offers maximum grip with the clutches during hard acceleration.
- Produces more top end speed and longer belt life.
- Available for the most popular sled models in a standard 13/8" width and in a more aggressive 1 1/2" width.

**Rated to 250 HP**

\$169.95-F

210-12586	Polaris (1 1/2" x 47 1/4")
210-12587	Ski Doo (1 1/2" x 44 1/4")
210-12588	Arctic Cat (1 1/2" x 47 3/4")

**Gates Extreme**

\$69.95-H

Uses advanced composite technology to maximize durability and functional performance over the life of the belt. This belt is designed for aggressive trail running and hyper-sled action requiring wear resistant and instant response.

206-3102	38 x 4320	206-3105	38 x 4351
206-3118	38 x 5140	206-3119	38 x 5210
206-3123	44 x 4640		

**Gates Trail Runner**

Designed to outlast ordinary snowmobile belts. It is engineered especially for entry level or touring sleds or for riders with moderate demands wanting long service life and dependability.

206-2104	25T4325	\$29.95-H	206-2114	38T4640	\$32.95-H
206-2119	44T4640	\$50.95-H			

**Dayco XTX - Extreme Torque Snowmobile Belt**

\$139.95-H

Dayco's most powerful belt built for the most extreme machines. The new XTX is specifically engineered to maximize the performance of high horsepower snowmobiles.

Specially formulated high temperature Polymer along with the highest level of engineered reinforcement proves to perform better in belt operating temperature and efficiency. Its innovative design of deeper cogs on top and rounded cogs on the bottom yield the advantages of ultimate flexibility and longer belt life.

- Faster and more consistent throttle response at high speeds
- Quicker throttle response at mid-speed acceleration
- Greater secondary acceleration at high RPMs as primary acceleration increases
- Reduction in slippage during the highest levels of torque providing more power to track
- Better performance during deceleration (more responsive engine braking)

**Dayco HTX - High Performance Extreme Snowmobile Belt**

\$89.95-H

Designed for use on high horsepower snowmobiles. Featuring Dayco's Top Cog® design for increased flexibility and longer belt life, this high horsepower belt is constructed with over-sized p-aramid cords and CVT rubber compounding to deliver the increased strength and durability that's required to stand up to today's higher snowmobile engine RPM's and operating temperatures.

Know that when you need to "clutch-down" the Dayco HPX Snowmobile Belt will deliver a full range of power to attack any terrain without a loss of horsepower.

**BELTS**

**Ultimax XS®**

\$129.95-H

XS is designed for high horsepower sleds and delivers superior performance and longer belt life.

XS features a specially formulated rubber compound found in no other snowmobile belt. Tests prove that XS transfers more power and runs cooler. For high performance sleds, capture the power with Ultimax® XS.

**ULTIMAX® PRO**

\$99.95-H

The new Pro belt features a thicker cross section so more surface area contacts the clutch. This means less slippage over a broader speed range for quicker acceleration.

The new cog design dissipates heat and aids flexibility. Cooler running belts mean better performance and longer lasting belts. Run cool, run long, run fast with Ultimax® Pro.

**MAX® BELT**

\$49.95-H

The Max belt is designed for general service machines under 500 cc. The new Max has an improved cog design for greater flexibility and cooler running. The new thicker Max has added strength that provides longer belt life.

- Expect added resilience and long life on virtually all general service machines.
