## TDR REEDS

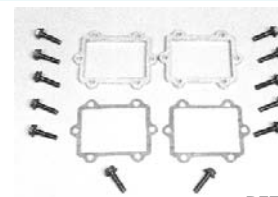

- TDR "HYPER TENSION" reeds are made of the highest quality material available
- By changing the reed design to a single or double petal instead of multiple petals, the velocity and overall air flow is increased and the motor produces more mid to top-end horsepower.
- TDR "HYPER TENSION" reeds use a tension reducing spacer to reduce the bending resistance of the reed petal. This spacer allows the reed to open quicker.
- TDR carbon fibre reeds offer long life and excellent high RPM. performance using TDR's tension reducing spacer.

### Reed Spacer Torque Kits

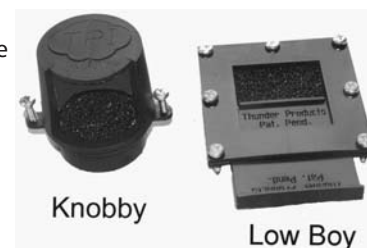

- Increased performance and quicker throttle response.
- Pulls reed cage out of intake allowing more transfer fill time.
- Gains of up to 3 hp from low to upper mid range also cleans up low end.
- Big twins respond well to spacers.

### Make your Polaris engine run smoother with TPI valves!

By installing a set of TPI valves into/onto an air box, the engine is allowed to breathe more easily. More air means more power, as your engine is basically an air pump. The (patent pending) TPI Air Valve is an adjustable intake valve that can be mounted inside or outside of the air box, allowing you to better control the airflow characteristics.
