

Alpine Head Shim

547-1050

\$119.95-J

Fits MPI Stage 1 upgradable Apex Supercharger that has been upgraded to Stage 2A. The Head Shim is required to lower the engine's compression ratio in order to run premium fuel instead of race fuel.

- Shim will effectively drop compression from 11.7:1 down to
- Shim is designed to use a complete head gasket on each side.
- Laser cut for precision accuracy

Reed Spacer Torque Kits

- Increased performance and quicker throttle response.
- Pulls reed cage out of intake allowing more transfer fill time.
- Gains of up to 3 hp from low to upper mid range also cleans up low end.
- Big twins respond well to spacers although works best on non EFI models.
- Comes complete with necessary bolts (if needed), gaskets and instructions.

ARCTIC CAT

440 / 500 / 600 twins
(except lay down twins)

594-2002

\$84.95-H

800/900 Twins
(F5/F6/F7/F8 laydown style)

594-2003

\$84.95-H

All Triples

594-2004

\$99.95-H

POLARIS

All Twins

594-2005

\$84.95-H

All Triples

594-2006

\$99.95-H

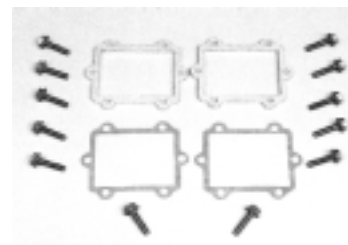

SKI DOO

600HO / 700 / 800 Twins
(Excluding '07-'10 Ski Doo 800R)

594-2007

\$84.95-H

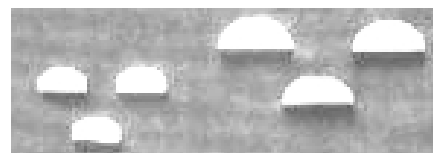

Works great on 800 HO Power Tek to replace stock thick spacer

Arctic Cat Offset Ignition Keys

The Offset key allows an advanced timing curve to give up to 2 horse power gain. One to three degree advance depending upon stroke, rod location and offset. Many new engines have fixed stator plates, so offset key offers option of changing time. Applications are recommendations only - jetting may be required if going too far.

- More power and acceleration with up to 2 hp. Gain
- Degrees of advance depend upon stroke, rod location, and offset
- Simple timing option for fixed stator plates
- Premium fuel may be required with larger advancement
