Ski Spindle Bushing Kit

900-6299

\$29.95-H

The Ski Spindle Bushing Set eliminates the side to side play in the skis. It contributes to a more precise front end setup. Even with the factory zerk fittings, there is still metal to metal contact between the factory spindle bushing and the spindles. Almost every time you ride, the powder snow will dry out the grease in this area. The more you ride, the greater the wear. The result is no metal to metal contact. This means no wear, no maintenance. Another advantage is your skis will stay pointed where they were set.
