

RACER'S EDGE CHROMOLY

Our chromoly tubing allows for substantial weight savings because of its light-weight construction and high strength alloy. It may be used to replace the inexpensive and heavier steel used by the O.E.M's. This weight savings on Polaris and Ski-Doo snowmobiles provides easier handling, higher top speeds and increased flotation in deep snow.

Radius rods are sold in sets of four, containing two upper and two lower radius rods, which allow the use of O.E.M. ball joints.

NOTE: Narrower radius rods will lift the front end up by drawing the trailing arms in close to the belly pan. This provides improved deep snow flotation and easier side-hilling.
