

## WINDSHIELD INFO

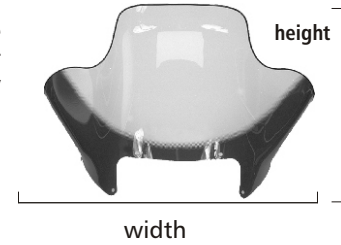

### OEM Style

These windshields are made by a leading OEM supplier with GE Lexan Polycarbonate, the strongest material available. Our high quality windshields are a good investment for your store yielding strong profits and customer satisfaction and the highest optical quality available.

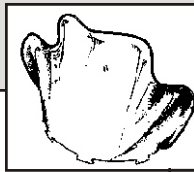

### Standard Style

Windshields are heavier than most OEM models, yet stay flexible at sub-zero temperatures. Most formed windshields feature a spoiler (air-flip) which helps protect the rider from the wind. Windshields are finished with a black trim around the outer edge and come shrink-wrapped so your customers receive an unmarked, quality product.

- Windshield measurements are top center to bottom. This does not include any mounting tabs.
- **NO returns accepted if plastic covering is removed from windshield**
